

ENVIRONMENT AND TRADE

A Guide to WTO Jurisprudence

Nathalie Bernasconi-Osterwalder, Daniel Magraw,
Maria Julia Oliva, Marcos Orellana and Elisabeth Tuerk

15% off

*Foreword by Phillipe Roch, Former Director of the Swiss Agency
for the Environment, Forests and Landscape (SAEFL)*

- The most comprehensive and accessible guide to environment and trade, with thorough coverage of WTO rulings and impacts
- An easy-to-use and accessible tool for practitioners, civil society, academics, students, and policy-makers who work on environment and/or trade issues
- Authored by world-leading authorities on environment and trade law from the Centre for International Environmental Law (CIEL)

International trade rules have significant impacts on environmental law and policy, at the domestic, regional and global levels. In the WTO, dispute settlement tribunals are increasingly called to decide on environment-related questions. For example:

- Can members treat products differently based on environmental considerations?
- Can members block the import of highly carcinogenic asbestos-containing products or genetically modified products crops?
- Can members require labelling for “dolphin-friendly” tuna?

This Guide, authored by five world leaders on international environmental and trade law at the Center for International Environmental Law (CIEL), is an accessible, comprehensive, one-of-a-kind compendium of environment and trade jurisprudence under the WTO.

Providing an overview for both experts and non-experts of the major themes relevant to environment and trade, it also analyses how WTO tribunals have approached these themes in concrete disputes and provides selected excerpts of the most significant cases.

Published with the Center for International Environmental Law (CIEL)
